Mission Statement

With a guiding principle that good environmental policy is also good economic policy, the purpose of the Agawam Energy Commission is to assist the efforts of the Town toward a sustainable energy future.

The Commission is committed to working with the Town’s public and private sectors (e.g., municipal, business, commercial, residential, agricultural and institutional) to achieve high levels of energy efficiency and resource management, and to reduce effects of resource disruption/depletion and changing climate patterns. The Commission will work with the Town to identify, develop, implement and manage programs and policies that meet the current needs of the Town for the benefit of present and future generations of Agawam residents.
