PRESS RELEASE

For Immediate Release:

5/9/2023

Meadow Street to receive new drainage and water mains.

The Agawam DPW is pleased to announce that we've partnered with Woodard and Curran and Caracas Construction to replace 7,100 feet of 100-year-old water main and 2,400 feet of undersized drain pipe. The water main upgrades will improve the Town's ability to provide water service to residents and businesses, and the drainage improvements will help alleviate chronic street flooding. The project will begin on May 15th and is expected to be completed in late fall of this year. Final repaving of the road is expected in the spring of 2024. During construction, Caracas has been given permission to close Meadow Street to thru traffic during the workday. As with all construction projects, there will be some traffic delays and we encourage motorists to avoid this area if possible.

Please feel free to contact the DPW with any questions or concerns at 413-821-0600.

Sincerely,

Mario Mazza
DPW Superintendent
